

Scott D. Ganz, DMD

Scott D. Ganz, DMD graduated from the University of Medicine and Dentistry - New Jersey Dental School. He completed a three-year specialty program in Maxillofacial Prosthetics at M.D. Anderson Cancer Center in Houston, Texas. This has been followed by 20 years clinical experience with most major implant systems available today.

Dr. Ganz has published extensively in scientific and professional journals. He has delivered presentations both nationally and internationally on Implant Dentistry and Computer Utilization for Diagnostic, Graphical, and Treatment Planning Applications in Dentistry. He has been a featured speaker for numerous organizations including AO, AAOMS, AAID, AAMP, ICOI, and the ACP. He is a Diplomate of the International Congress of Oral Implantologists, a Fellow of the American Academy of Maxillofacial Prosthetics and the Academy of Osseointegration, and a long time member of the American College of Prosthodontists.

Dr. Ganz is a member of the Board of Directors of the N.J. Section of the American College of Prosthodontists for which he is a Past-President. Currently he is on the staff of Hackensack University Medical Center, and the University of Medicine and Dentistry of New Jersey.

Dr. Ganz has also been a pioneer in the development of interactive multi-media presentations and educational material. He maintains a private practice for Prosthodontics, Maxillofacial Prosthetics, and Implant Dentistry in Fort Lee, and Ridgewood, New Jersey.

Atlantis

MDS Seminar Series 2007

Patient-Specific Atlantis Abutments

One important key to successful implant restorations is the design and fit of

each abutment. This seminar will focus on the Atlantis Components, Inc. system for the design and manufacture of implant abutments. The Atlantis system offers patient-specific abutments that have unique, accurate, and precise

margins. It provides an ideal emergence profile, replicating the natural root form of the tooth it is replacing and providing optimal interproximal support, thus

providing ideal crown support that effectively distributes occlusal forces and reduces the potential for cracking.

LEARNING OBJECTIVES:

- Participants will learn how Atlantis can increase profitability, simplify implant treatment protocols, and provide optimal esthetic results.
- Surgeons will learn how to increase patient referrals.
- Restorative clinicians will learn how to eliminate final impressions and cord-packing yet still achieve perfect gingival margins on restorations.
- Restorative clinicians will learn how they can decrease chairtime by 50% or more with the Atlantis Abutment System.
- Participants will learn how Atlantis Abutments can be used in any implant protocol including:
 - Two Stage with Stage One Indexing
 - Two Stage without Stage One Indexing
 - Single Stage
 - Immediate Loading
 - Early Loading
 - Combined Cases
- Participants will learn how Atlantis Abutments can improve the clinical outcomes of even the most complicated implant cases.

Date: November 6, 2007

Time: 7:00 – 10:00 PM
Registration 6:30 PM
Dinner & Dessert Included
